

2020 - 2021 ANNUAL ASBESTOS OFFICIAL NOTIFICATION

September 10, 2020

Dear Tipton Academy Parents, Students and Staff:

Pursuant to the Environmental Protection Agency (EPA) Asbestos Hazard Emergency Response Act, **AHERA**, 40 CFR 763, Tipton Academy is complying with the annual asbestos notification with this publication. Certain construction material may contain asbestos, and are considered Asbestos Containing Building Materials (ACBM).

Tipton Academy continuously monitors the status of known and assumed ACBM throughout its facility. This is accomplished by conducting six-month periodic surveys in conjunction with three year re-inspections of newly identified or remaining ACBM. Based upon these activities, required maintenance or renovation response actions, abatement of asbestos materials may be necessary.

Our asbestos management plan is available at the Main Office building and can be reviewed by interested individuals during normal business hours. Additionally, your school and/or facility Asbestos Management Plan is also available for review during normal business hours.

If you have any questions regarding this notice, please contact Dr. Kyle Lackey at (734) 261-0500.
